

## Response to Request for Information

Reference      FOI 003328  
Date            7 March 2019

### ***Statistics for the Annually Replacement of Road Studs***

#### **Request:**

I would very much appreciate information for the number of Road Studs that are replaced Annually in the UK within your Region (can be from any year) but please specify the year.

It would also be helpful if you could tell me the total miles of roads that you maintain/look after for your region?

In response to your above request, we can confirm that in the year 2018-2019, 84 road studs were replaced.
