We keep a record and monitor "active" Section 106 agreements, that is ones that relate to permissions that have been implemented, where obligations are or will be due but have not yet been received, or where contributions have been received but not yet spent. The document is attached and will provide some of the information that you request. Please note that it does not include Section 106 agreements where contributions have been received and spent or ones that relate to planning applications that were not implemented and have expired.
