LED Street Lighting

Request:

Could you please provide information on all LED street lighting currently installed in the Borough giving the following information on each installation ~ Please show maximum operating levels and any relevant dimming levels including relevant operating hours.

- Luminiscent Flux (std SI unit Lm) = 25Klm
- Spectral Power (w/m) - [See graph – Our current standard LED lantern is cool white and we are moving to neutral white this year](#)
- Wavelength (Mn) - [See graph – Our current standard LED lantern is cool white and we are moving to neutral white this year](#)

led spectral power per 1000lm
