Electric Vehicles – Charging Points

Request:

Charging points for electric vehicles have become more widespread in Wolverhampton recently. I would like to request some information about them.

- a) What is the total cost of investment into Wolverhampton City Council's EV charging network since its creation? **£0 have been spent by the council**
 - Roughly what percentage of
 - **a) was spent on:**
 - EV chargers? **£0 on chargers**
 - Installation? **£0 on installation**
 - Maintenance services? **£0 on maintenance services**
 - Management services? **£0 on management services**
- b) How many charge public charge points are owned by Wolverhampton City Council? **No charge points are owned or operated by the Council.**
- c) How many charge public charge points does Wolverhampton have? **No public record held at the Council, Zap-Map.com hold most accurate records.**
- d) How many additional electric vehicle charging points are scheduled or planned to be installed by the end of the calendar year 2024. ** where known please provide year by year breakdown**
24 public and taxi chargepoints scheduled in next 2 years:
2018/2019 - (7)
2019/2020 - (17) (see article
<http://www.wolverhampton.gov.uk/article/11422/New-electric-taxi-charging-points-to-also-be-publicly-accessible>)
- e) How have you procured electric vehicle infrastructure in the past? **Tender or framework purchase**
We haven't procured any in the past, currently negotiating contract for d)
