Improving Public Health

Request:

I'm emailing this FOI request because I'm trying to find out how much local authorities are spending on enhanced services for improving public health, and the extent to which GPs are involved in providing these services. Examples include smoking cessation services and sexual health services.

Could you fill in this table please:

| | A list of public health enhanced services you commissioned or intend to commission | The value of each of these | How was/is each service being commissioned (ie, direct contract, tender process, AQP) | Were/are these services being commissioned solely to GP practices? |
